

## Stainless Steel Deep Water Container

Designed to hold a Tinytag Talk 2 temperature data logger, the Stainless Steel Deep Water Container is waterproof to a depth of 10km (32,800ft).

### ACS-0001

**Issue 1**  
5th September 2006  
E&OE

#### Popular Applications

- Deep Water Temperature Monitoring for
  - Environmental Monitoring
  - Geological Research
  - Deep Water Drilling

#### Features

- Water-proof to 10km (32,800ft)
- Marine grade stainless steel
- Negative buoyancy
- Suitable for use with TK-4014 and TK-4014-MED data loggers.

### Physical Specification

|                          |  |
|--------------------------|--|
| <b>IP Rating</b>         | IP68 (Waterproof)                                  |
| <b>Depth Rating</b>      | 10km (32,800ft)                                    |
| <b>Case Material</b>     | Stainless Steel (316)                              |
| <b>Operational Range</b> | -40°C to +85°C (-40°F to +185°F)<br>(non-freezing) |
| <b>Case Dimensions</b>   |  |
| <b>Diameter</b>          | 49mm / 1.93"                                       |
| <b>Height</b>            | 93.8mm / 3.69"                                     |
| <b>Mounting Hole</b>     | 10mm / 0.39" (diameter)                            |
| <b>Weight</b>            | 760g / 26.8oz                                      |

### Related Products

Data loggers suitable for use with the Stainless Steel Deep Water Container:

TK-4014: Tinytag Talk 2 Temperature Logger  
TK-4014-MED: Tinytag Talk 2 Medical Temperature Logger

### Approvals

This product is manufactured by Gemini Data Loggers (UK) Ltd to BS EN ISO9001:2000 (Certificate No. 6134).
